Business Productivity Technology: WorldCard Office -Business Card Color Scanner and Contact Information Management Software

Are you tired of spending endless hours, trying to organize piles of business cards into information database? WorldCard business card scanning, recognition and contact information management systems is your solution. This product offers portability, speed and accuracy in business card scanning and management. Simply put your card in and let the scanner do the job, then sit back and watch the image of your card flow into your computer, and then every piece of information on the card - name, phone number, address, email, and website URL is extracted and stored directly into your computer database, so you can manage these information and turn them into useful sale leads in no time!

WorldCard Color features as a color scanner scans in full colors and stores scanned cards into a foldable tray. It's more than a business card scanner, but a full solution to manage all your ID cards and document sheets: business cards, driver's licenses, medical insurance cards, receipts, photos, etc.

WorldCard Color use the same version of the OCR and BCR recognition software (V5.0) as with WorldCard Office version. Therefore, it has all the business card scanning, recognition and data management functions as with WorldCard Office version.

In addition, WorldCard Color can scan 6 x 4 color pictures. The scanner comes with this version is a A6 size USB color scanner, which has a Twain compatible driver. That means you can use this scanner with any other applications that use Twain driver.

WorldCard Office supports various data extension. Contact information can be directly scanned into PC, Palm, WinCE and mobile phone devices seamlessly. Its friendly user interface makes editing and data exporting an easy task.
